Professional Experience

Founder | Ameba Game Studios

Kenmore, WA **July 2025 to present**

Founded indie game studio focused on 2D games and published 3 different mini-games in the first 6 months.

- **GMTK 2025 Participation:** Lead the gameplay design and singlehandedly developed the game in 4 days, scoring top 25% in art and top 30% in creativity, from 9,583 entries.
- **Future Releases**
 - Developing beta for unique puzzle game based on Rube Goldberg machines. ETA: Nov 2025.
 - Concept development for future original IP. Mix of Action-Platformer, RPG and *Shoot them up* genres.

Senior Technical Program Manager | Amazon Music, Advertising, Fashion Tech

Seattle, WA **Nov 2015 – June 2024**

Led large-scale infrastructure optimization, AR-driven solutions, and cross-platform scalability across Amazon's tech ecosystem.

- **AR/VR Innovation & Engineering Excellence**
 - Spearheaded the release of [Virtual Try-On for Shoes using AR](#), utilizing **ARKit** for real-time visualization.
 - Defined and optimized launch metrics with **computer vision engineers**, **enhancing image tracking by 30%** and **reducing load time from 700ms to 300ms**.
- **Performance Optimization & Scalability for Audio Streaming**
 - Led **engineering excellence** initiatives, optimizing Amazon Music's usage of AWS infrastructure for data streaming, audio encoding/decoding, storage management and search, reducing costs from **US\$300K in 2022 to US\$20M by 2024**.
 - Designed and standardized **automated load testing**, reducing validation time for high-traffic events – like Prime Day - by **25%**.
- **System Architecture & Migration**
 - Led **Amazon Advertising's transition from monolithic architecture to SOA**, supporting scalable and responsive web applications.
 - Launched the [Amazon Ads API](#), allowing third-party partners to programmatically create and optimize advertisements.

Senior Software Developer Engineer | Banco de Chile, El Mercurio, I2B Technologies

Santiago, Chile **Oct 2006 – Aug 2014**

Architected and developed scalable applications, modernized legacy systems, and implemented **cloud-based and mobile solutions**.

- Designed and migrated **self-service banking** web and mobile apps, integrating **Java EE and AngularJS**.
- Led **ad-serving web app modernization** using **Ruby on Rails and jQuery**, increasing performance by **40%**.
- Developed customer-facing portals with advanced **authentication, authorization, and localization** features.

Education & Certifications

- **AWS Machine Learning Certification** Amazon Machine Learning University **2022 – 2023**
- **B.S. in Computer Science** Universidad de Santiago de Chile **2002 – 2006**
- **Music Theory, Drums** Universidad de Chile, Arts Faculty **2009 – 2011**

Key Skills

- **Augmented Reality (AR), Virtual Reality (VR):** ARKit, RealityKit (actively learning), Unity Engine
- **Software Development:** Java, Ruby on Rails, C#, Lua
- **Graphics & Performance Optimization:** game development profiling and shader programming.
- **Cloud & Scalability:** AWS, budget planning & monitoring, distributed systems, reliability engineering, load testing
- **System Architecture:** SOA, microservices, CI/CD, observability
- **Leadership & Collaboration:** Technical mentoring, cross-functional communication, process improvement
